

Proper documentation of BW objects helps later phases of BW implementation & minimizes budget overruns. A good customer facing self-help documentation tool reduces maintenance costs. Cataloging technical objects both minimizes redundant objects and helps improve consistency & quality of objects. Cataloging & categorization are necessary for smooth upgrades & rollouts.

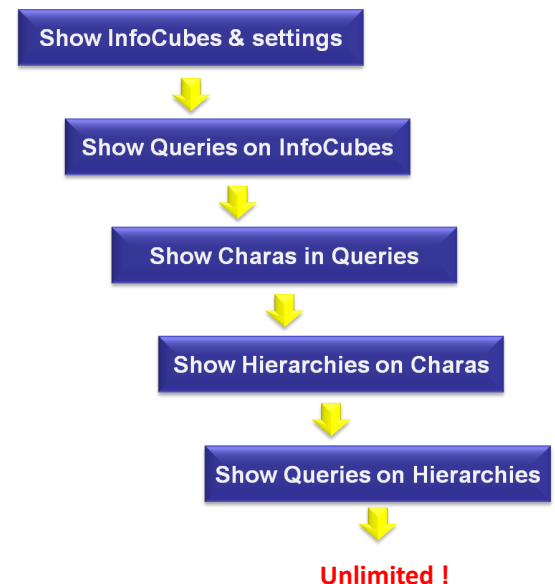

Key Benefits

- Minimize budget overruns
- Minimize support tickets
- Minimize redundant objects
- Easy access of documentation to tech team & business users
- Review technical settings of BW objects for

Some usage scenarios

Drill thru Reports

Key Features

- Generate reports of all types of BW objects
- 70+ custom reports delivered
- Generate unlimited drill thru reports
- Customize report layout
- Upload/download documentation (like Tech Specs)
- Attach Word, Excel, Visio, PPT, etc documents to BW objects
- Searchable documentation
- Categorize objects by modules & sub-modules
- Categorize objects by custom categories
- Customize categories to suit business needs

The screenshot shows the Erada's MyBI interface with several callouts:

- Unlimited drill thru reports**: Points to the top navigation tabs.
- Report on ANY BW object**: Points to the left-hand tree view.
- Upload/download documentation**: Points to a toolbar icon.
- Show ALL tech settings in one location**: Points to a table of technical settings.
- Code Text and Value configuration**: Points to a configuration dialog box.
- Customize categories**: Points to a list of codes in the configuration dialog.
- Drill thru to ANY linked object**: Points to the 'Subsequent Reports' section.
- ... and much more ...**: Points to the bottom of the interface.
